

Vision Software Instructions

Vision is the program to allow computer screens to be shared in the classroom. It runs automatically so you will see the screen below on log-in. If you don't see the Vision program window like below then you will need to re-boot the computer.

Follow the instruction below for instruction for common tasks:

1. Broadcast teacher station: Click on the **Demo -> Windowed** to broadcast you computer screen to the students.
2. Broadcast student station: Right click on a student computer and select **Showcase Student** to broadcast their screen to the class.
3. View student station: Double-click on a student computer
